#### **PRINT GUIDELINES**

- All artwork should be submitted as Vector art (.eps, .ai.) or as high res. .psd, .pdf, or .tiff (300 dpi min) with layers & transparent backgrounds.
- Converting artwork from 72 dpi to 300 dpi will not yield good results & in most cases not useable.
- For Larger files use our drop box please on our website
- 100 % Cotton prints better than blends. On White we can print Poly or Cotton, however on non-white, must be at least an 80/20 blend. **Cotton will ALWAYS print better.** Fleece must be 90% cotton; we recommend Hanes Print Pro Fleece. Dye lots may affect print quality in an order. To insure vibrancy, 30 single or combed cotton blanks should be ordered. Recommended brands are: District® Concert tees, Hanes Nano Tee, or other premium cotton blanks. 100% Polyester will work as long as it's white and not treated with a stain resistant chemical. Avoid products with more than a 1 X 1 rib fabric. Print does not get into the grooves properly.
  - Printing is a CMYK Process, there is no color matching, or pantone matching available.
